CARLIE GONZALEZ

SOFTWARE ENGINEER

San Marcos, CA | cjgonzalez2022@gmail.com | 949-847-2887

SUMMARY

Software Engineering student, graduating in May 2027. Experienced in developing interactive web applications using React, Next.js, JavaScript, and Python, with additional experience in C++ and embedded systems. Seeking a software engineering position to contribute to real-world software development projects.

PROFESSIONAL EXPERIENCE

Treobytes Facilitator- San Diego, CA **July 2025- Present**

- Teach coding, robotics, and drone technology to middle school students through hands-on projects integrating programming, math, and physics.
- Configure and troubleshoot robotics and drone equipment while collaborating with team members to coordinate programs across multiple locations.

PROJECTS

Little Learners Website| Next.js, React, JavaScript

- Developed an interactive educational website for children ages 3–10, featuring games, quizzes, and lessons across multiple subjects.
- Implemented personalized learning activities and progress tracking using JavaScript and localStorage.

Smart Baking Assistant| React, JavaScript, CSS

- Developed a responsive recipe interface with search, category filters, and step-by-step cooking instructions.
- Collaborated with a team to design a smart cooking application with planned digital scale integration.

ESP-32 MP3 Player| C++, Arduino IDE, UART, I2C

- Programmed an ESP32-based MP3 player integrating an OLED display, physical controls, and a DFPlayer Mini audio module.
- Implemented UART and I2C communication for audio playback and display updates.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL, HTML/CSS
Frameworks & Libraries: React, Next.js, Django
T**ools & Technologies:** Git, GitHub, Arduino IDE, VS Code
Concepts: Object-Oriented Programming, Web Development, Embedded Systems

EDUCATION

California State University San Marcos **Expected May 2027**
Bachelor of Science, Software Engineering
